

We have just completed construction on our new home on Jupiter Island, Florida. The house is over 6,000 square feet and the construction took 19 months to complete. Our first meeting with Ali Reynolds was in our architect's office in April of 2011. We had no idea at that first meeting how integral Ali would be to the successful completion of the project.

Ali has an incredible knowledge of all phases of design and construction. She worked tirelessly with the architects, contractor, landscape architect, interior decorator and all of the subs, suppliers and vendors. Her attention to detail is scrupulous and she was in constant communication with all of us to make sure the project ran smoothly and that no detail was overlooked.

Ali has superior people skills and a wonderfully high energy level. She worked well with everyone involved on the job, was always in a terrific mood and never saw an obstacle that couldn't be overcome.

It is fair to say that we cannot imagine how we could have completed this job without the superior team that worked on our home and Ali was a huge part of the success of the project. We recommend her highly and wholeheartedly.
